Selection of Fastening Systems for ‚Shipbuilding‘

Be it an oil tanker, cargo ship, cruise ship or private yacht: RSB® block clamps and tube clamps are successfully used on ships of every shape and size all over the world. In addition to standard products according DIN 3015, the comprehensive RSB® product range of course also provides solutions outside the norm. Below you will find a small selection of products which are particularly suitable for shipbuilding.

Conform to the norm - Certifications

The quality of our RSB® fastening systems is of course also confirmed in black and white! For the ‚shipbuilding‘ sector we hold the following certifications:

<p>SPACE SAVING</p>	<p>COMBINATION</p>	<p>VIBRATION</p>
<p>1. RSB®-Multiclamp One clamp size covers tube diameters from 6 to 35 mm. Customized fitting with elastomer inserts. Flexible, space-saving, individual! Compatible with ‚2+5-System‘.</p>	<p>2. RSB®- ‚2+5-System‘ Two clamp sizes cover pipe diameters from 6 to 42 mm. Only one multiple weld plate with uniform bolt spacing for all tube clamps of the sizes 2+5.</p>	<p>3. EFA Tube clamps with noise protection insert. Optimal vibration isolation and structure-borne sound decoupling in combination.</p>
<p>CORROSION</p>	<p>COMPATIBILITY</p>	<p>SOUND</p>
<p>4. CR-Clamp A special corrosion inhibitor retards crevice corrosion between the clamp bodies and the tube. Salt spray test according to DIN EN ISO 9227.</p>	<p>5. Fixed Adaptor Compatibility with profile rail systems of the foll. manufacturers: HILTI (System MQ medium load), HALFEN (medium-heavy load-bearing systems), UNISTRUT®, SIKLA.</p>	<p>6. EE Standard-tube clamps with noise protection insert according to DIN EN 3015.</p>

You require further information on our products? You have any questions about the application or are interested in a special solution? Our RSB® team will be happy to advise you! Please do not hesitate to contact us!
